Statistical analyses website suite

PlexCall Tracker is a web based software suite with an optional mobile App. Generate Monthly, Weekly, Daily and Hourly view reports that can be graphed and printed. Reports can include a detailed break down of calls by theatre. Features include report filtering by date, hour, theatre, sections and rows.

The mobile App is a great compliment, allowing instant viewing of prior day statistics. See problems at a glance with color coded response times and red seats.

Next time you have an upset patron, use PlexCall Tracker to find and resolve the problem.
